

FOR SALE

Certified Pre-Owned Funk La Ruta 29+ | Complete Build

TITANIUM

Handmade in Colorado

- Size: **XL / 21"** (Ideal for someone who is 6'2" – 6'5")
- Weight (as pictured) 25.1 lbs
- Level A Build (Carbon Lefty, Carbon Wheels, XX1 Groupo)
- Price **\$4995** as shown

What's the Story with this Bike?

- This bike was a trade-in from a current customer on the east coast, who traded in this bike, for an even larger size frame in May of 2019.
- The frame was fabricated and built in the summer of 2017
- The frame maintains the warranty from the summer of 2017 in service date
- Many of the components on the build, are what the customer put on the frame

What does it mean that it is Certified Pre-Owned

- The frame has been inspected by the Funk team (frame and components).
- The frame has a brand-new media blast finish on it, so the frame looks, and feels brand new.
- There were several components which Funk swapped out to baseline the build to make it "turn-key" for the next customer. The following parts are all **brand new** as part of this build:
 - SRAM XX1 11sp Chain
 - SRAM 30T Chainring
 - SRAM BSA Bottom Bracket
 - SRAM Brake Pads (Front and Rear)
 - SRAM Centerline Rotors (Front and Rear)
 - WTB Volt 142 Titanium Rails Saddle
 - SRAM Trigger Shifter
 - Terrene McFly 2.8 Light Casing Tires. Qty 2.

Other data points:

- Details on this frame can be found [here](#)
- Hubs spin nicely and are in really good shape
- Lefty was serviced by Project321 last year, along with rear hub
- Suspension feels great and works as expected (both front and rear). 90mm of travel on the Lefty and ~1.8" of travel at the rear (1.25" throw).

Frame Sizing:

- This is an XL Frame. 21" Seat tube. Ideally this fits someone between 6'2" and 6'5"
- The Effective Top Tube Length is 25.5"
- Chain stay lengths are adjustable 17.6-18.2"
- 70.5 Head Tube Angle
- It has an English Threaded Bottom Bracket 73mm
- Boost (148x12mm TA) Spacing at the rear
