

# How to Build a Budget-Friendly Lecture Capture System with Microsoft Teams & your LMS

# Microsoft Teams: An Affordable Lecture Capture Solution

Budget constraints shouldn't limit quality education. Microsoft Teams offers a cost-effective alternative to expensive lecture capture systems.

We'll explore how Teams seamlessly integrates with MEDIAL content management for a complete solution.

 by Robert Thomas

# Leveraging Microsoft Teams for Lecture Capture

## One-Click Recording

Capture lectures with a single click. Store recordings automatically in the cloud.

## Versatile Content Sharing

Present slides, applications, or entire desktop. Toggle between content types seamlessly.

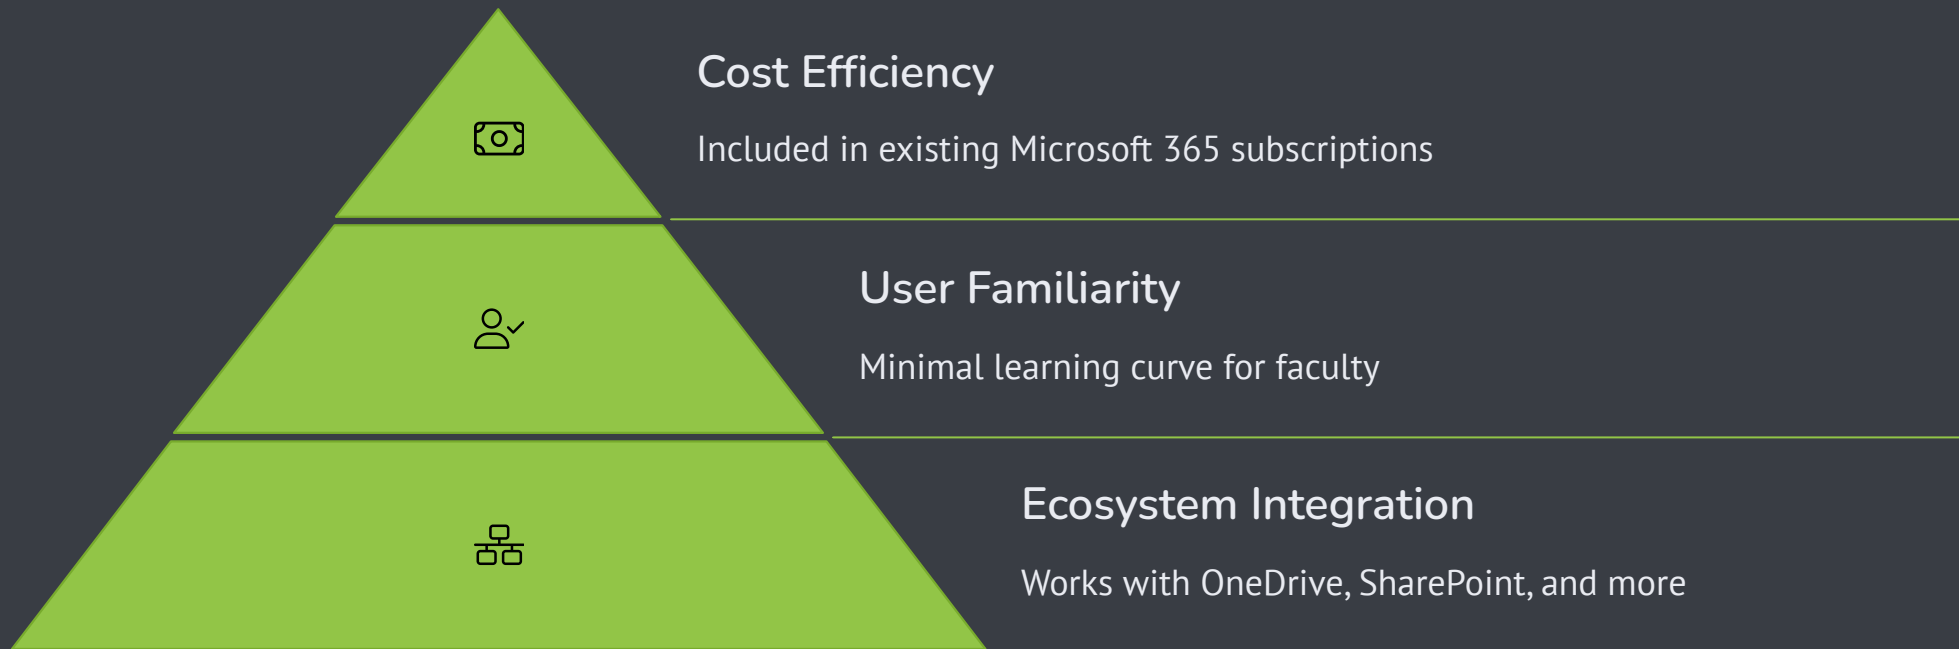

## Automatic Accessibility

Generate transcripts in real-time. Add closed captions to recordings automatically.

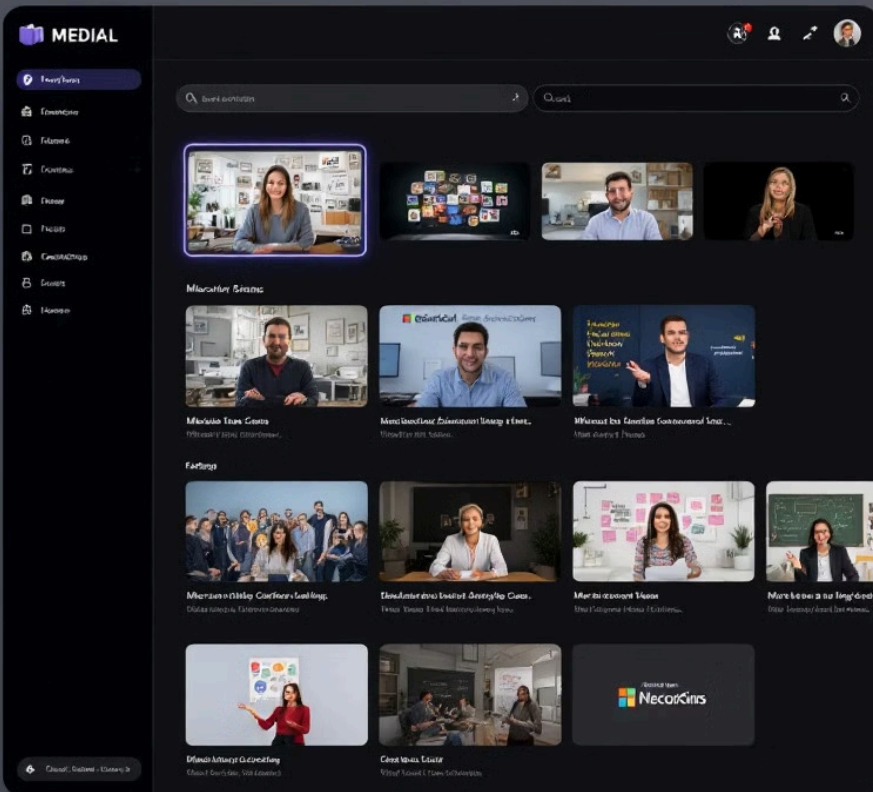

# Key Benefits of Using Microsoft Teams

Teams leverages your existing Microsoft investment. No specialized hardware required.

# Integrating Microsoft Teams with MEDIAL

## Record in Teams

Capture lecture content using familiar Teams interface

## Automatic Transfer

Recordings move to MEDIAL without manual steps

## Organize Content

Categorize by course, topic, or date in MEDIAL

## Distribute

Share with students through LMS integration

# Implementing Teams + MEDIAL Solution

## Configure Teams Settings

Enable recording permissions for faculty. Set up automatic transcription features.

## Establish MEDIAL Connection

Configure API integration between Teams and MEDIAL. Test authentication flows.

## Train Faculty

Provide quick-start guides. Offer hands-on workshops for instructors.

## Monitor & Optimize

Gather feedback regularly. Make adjustments to improve workflow.
