## ABOUT SIGNITT

The Signitt team has over 20 years of experience creating and "packaging" profiles for major corporations and highly successful C-Suite executives. Some executives need a higher profile for job advancement; others are transitioning careers or looking for board positions. They all realize that a strong, complete online image is essential to ongoing success.

## OUR MISSION:

We have interviewed over 800 people and created their stories to establish or reinforce their online presence. We saw that over 90% of our interviewees were men. This is when, six years ago, our Signitt mission to help women was born.
