

Dear collaborator,

On behalf of UEFISCDI, we are happy to invite you to join the workshop “Sustaining regional innovation: moving towards high technologies”, held on 17.09.2019 inside the “Innovation Café”, at University Politehnica of Bucharest, Room: Central Library. The Innovation Café will start at 16.00 and the workshop “Sustaining regional innovation: moving towards high technologies” at 17.30.

The workshop brings together entrepreneurs, representatives of universities and of public sector to discuss innovative ideas on high technologies, with focus on high performance computing, and proposals on guidelines to integrate these in daily activities and policies.

Context:

The event is taking place within the Erasmus+ project SME/HPC (<https://www.smehpc.eu>).

Very few SMEs are aware of the potential of how HPC (High Performance Computing) can drive competitive advantage and enhance the levels of innovation capacity, capability and practice of SMEs. Therefore the purpose of the SME/HPC project is to develop a tailor-made HPC programme to assist higher education institutions engage with SMEs to both create awareness about HPC and to encourage SMEs to use HPC by explain how HPC can provide them with competitive advantage.

Looking forward to your answer please do not hesitate to contact us for further questions about the event.

Kind regards,

Raluca Coscodaru
