

Capital Access Group Services

Capital Access Group is one of the UK's longest established and leading providers of corporate access and related IR services.

CAG undertakes no trading or other services for which investors are charged. We act only on behalf of the listed companies who are our clients.

All CAG's services are categorised as falling within what MiFID II defines as a **"Minor non-monetary benefit"**. As such investors can be confident that there are no inducements or conflicts of interest. In short, CAG offers services that are entirely exempt from such considerations under MiFID II and are compliant in all other extant regulations.

CAG specialises in managing investor contact for a range of UK quoted companies. These services include shareholder analytics, investor targeting, research commentary, investor feedback as well as corporate access.

Over 2018/19, CAG arranged and managed more than 2,000 investor meetings for over 70 UK companies. We only charge corporate clients for these services.

We work alongside the brokers and investment banks to listed companies and help extend their reach to a wider pool of investors and types of fund.

We are always glad to hear from listed companies, brokers or investors who want to find out more about our services.
