WHAT IS PHYTOCERAMIDES?

Turn back the clock with Phytoceramides - A Natural Facelift

Safer, cheaper and easier than a facelift or chemical peel, this secret can help drop a decade from your face.

Faking a facelift may be as easy as taking one little pill! Phytoceramides help to reduce fine lines and wrinkles and improve the structural integrity of the skin. Used in Japan for centuries, the FDA has just approved the oral use of this powerful anti-ager.

Phytoceramides are the plant-derived equivalent of ceramides, a lipid that keeps your skin hydrated and plump. You start to lose ceramides as you age, and as a result, your skin begins to appear rough and wrinkled. Taking Phytoceramides orally restores the natural outer layer of the skin. These powerful molecules work from the inside out, getting absorbed into the bloodstream and carried to the inner layer of your skin. From there, they seep to the outermost layer where they restore the cracked and damaged barrier, moisturize and fill out wrinkles and sun-damaged areas.

While most Phytoceramides are produced from wheat (gluten allergy is cautioned against trying them), here at Meta-Labs our Phytoceramides supplement is produced from rice and sweet potatoes. Expect to take the product for at least a month before you start seeing results.

*Pair with Meta-Labs Phytoceramides Cream (Instant face lift for 3-4 hours) for amazing results!

Suggested Use

As a dietary supplement, take one (1) capsule fifteen (15) minutes before meals, or as directed by a health care professional.

KEEP OUT OF REACH OF CHILDREN

WARNING: If you are pregnant, nursing, taking any medications or planning any medical procedure, consult your doctor before use. Discontinue use and consult a doctor if any adverse reactions occur.
