

Not only do we make the supplements! We make the supplements Better.

TEST - 1

8 OZ & 4 OZ

WHAT IS TEST -1?

Testosterone is the key male hormone. Testosterone influences men's muscle mass and strength, sex drive, erectile function, bone density, hair growth, red blood cell production, aggression, fat distribution, sleep patterns, and many other factors in a man's life. With testosterone being such an important hormone and controlling so many different functions of your body, it is vital to make sure that your testosterone levels do not get too low. As a man ages, the amount of testosterone in his body gradually declines. This natural decline starts after age 30 and continues throughout life. Therefore, to counteract this natural decline, you need to actively do something to raise your Testosterone levels.

TEST-1 Homeopathic Testosterone Cream, produced by Meta Labs, is a topical cream with high levels of homeopathic, all-natural testosterone. TEST-1 Homeopathic Testosterone Cream was specifically developed to get you back on track. You can get the muscle definition you are looking for, increase your sex drive and stamina, improve your sleep, and reduce your cholesterol all at the same time!

What options are available for testosterone replacement?

- Intramuscular injections, generally every two or three weeks
- Testosterone patches worn either on the body or on the scrotum (the sac that contains the testicles). These patches are used daily. The body patch application is rotated between the buttocks, arms, back or abdomen.
- Testosterone creams that are applied daily to the shoulders, upper arms, or abdomen.
-

Each of these options provides adequate levels of hormone replacement. However, each also has side effects, advantages, and disadvantages:

- Intramuscular injections produce wider swings in hormone concentration, with higher levels shortly after the injection and lower levels just before the next injection is due. They may also produce increases in blood cell count that are higher than normal.
- Body patches may produce skin irritation in a significant number of men, requiring discontinuation of the patch.
- Creams only require care in making sure that the hormone is not accidentally transferred to another person.

There are currently no pills available in the United States that provide adequate levels of hormone replacement. In addition, oral medications may produce liver abnormalities and are to be avoided.

Supplement Facts

Active Ingredients: Tribulus Terrestris, Trillium Erectum, Potency Wood Extract, Saw Palmetto Extract, Orchic Substance, Mexican Wild Yam, Mexican Sarsaparilla, Boron (amino acid chelate), Potentilla Erecta, Nettle Leaf.

Ingredients: Purified Water, Vegetable Stearic Acid, Almond Oil, Glycerine, Aloe Vera, Sodium Hydroxide, Grapefruit Seed Extract.

Directions: Apply ¼ tsp to thin skin area twice daily and 30 minutes before sex. Use 3 weeks on and one week off.
