

Not only do we make the supplements! We make the supplements BETTER.

EGGPLANT CREAM

8 OZ

WHAT IS EGGPLANT CREAM?

When it comes to sun exposure, our well-intentioned efforts to cover up with sunscreen are no longer doing the trick. Here at Meta Labs we have formulated an Eggplant Cream that used with your current sunscreen may assist in the elimination of non-melanoma skin lesion, including actinic keratosis, sunspots, basal cell carcinoma and squamous cell carcinoma.

Eggplant cream is recommended to be applied to areas of the skin that may have become discolored, thickened, or scaly as a result of exposure to sun (UV) light. These areas of the skin are known as keratosis.

In addition, Eggplant Cream works effectively against all forms of hyperpigmentation by lightening your skin evening out age spots, as well as helping to assist with different skin problems like Eczema & Psoriasis. Eggplant Cream is giving you the answer to skin discoloration - better choice than hydroquinone-based creams or other over-the-counter skin whiteners and brighteners.

Eggplant Cream is safe to use and works on all skin types, but because everyone's skin type and condition is different your usage may vary. Apply Eggplant Cream directly over the skin lesion twice a day for 14 weeks. Please consult your doctor before use.

Significantly less expensive compared to traditional treatments

Non-toxic to normal, healthy cells and non-toxic to body organs

May be highly effective for non-melanoma skin lesions

May help even out skin tones

Lightens and brightens your skin

May assist in different skin problems like Eczema & Psoriasis

Suggested Use

Apply Eggplant Cream directly over the skin lesion twice a day for 14 weeks.
